PRIVATE RIGHTS, PUBLIC CHOICES SERIES
CONTINUES MONDAY, FRIDAY IN BOZEMAN

MISSOULA--

The third and fourth in a series of free public lecture-discussions, sponsored under a \$4,500 grant from the Montana Committee for the Humanities (MCH), an organization with main offices at the University of Montana in Missoula, will be Monday and Friday, May 12 and 16, at Montana State University, Bozeman.

On Monday in the Student Union Ballroom, Dr. Leonard G. Wilson, professor and chairman of the Department of the History of Medicine at the University of Minnesota Medical School, will speak on "Medical Education in the U. S. at the Crossroads--the Flexner Report Today." Dr. Wilson is the author of "Sir Charles Lyell's Scientific Journals on the Species Question"; "Charles Lyell, The Years to 1841, The Revolution in Geology"; and "Selected Readings in the History of Physiology." He is editor of "Journal for the History of Medicine and Allied Sciences" and has been a professor at Berkeley, Cornell, Yale and London.

The panel participants following Dr. Wilson's presentation will include Del Samson, professor of sociology, MSU; Frank Newman, representing the WAMI Program; and Roy Schwarz and M. O. Young, who are both medical doctors.

On Friday in the Madison-Jefferson Room of the Student Union Building, Dr. Marx W. Wartofsky, professor of philosophy, Boston University, will discuss "Science and Art as Modes of Cognitive Practice." Dr. Wartofsky is director of the Boston Colloquium for the Philosophy of Science; editor of "Boston Studies in the Philosophy of Science"; and author of "Conceptual Foundations of Scientific Thought" and many articles on/philosophy of science. He recently gave a series of lectures at the Massachusetts Institute of Technology on the philosophical and social implications of technological innovation, which is to be published by Cambridge University Press.

Professors from MSU participating in a panel discussion following Dr. Wartofsky's remarks will include Wayne Larson, sociology; Kim Smith, art; John Hermanson, physics, and Harry Hausser, philosophy.

The lectures are being presented by the Bozeman Area Friends of the History of Philosophy of Science, the Upsilon-Phi Chapter of Phi Alpha Theta history honorary, the Longfellow School Parent and Teachers Association and the MSU branch of the medical school program known as WAMI (Washington, Alaska, Montana and Idaho).

Dr. Margaret Kingsland, Missoula, MCH director, said the purpose of the series is to deal with the impact of science and technology on American society as well as the implications and consequences of public policy in the life sciences area.

For more information, phone Dr. Pierce Mullen, chairman of the MSU Department of History, Government and Philosophy, 994-4395.
